

Toolbox Evolution

Toolbox

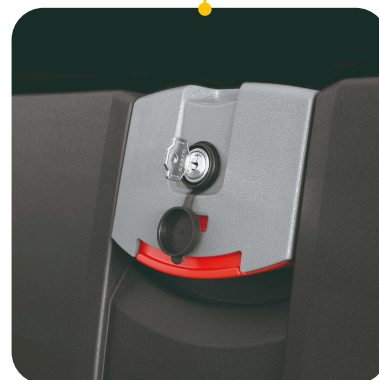

A modern designed toolbox, manufactured through injection moulding using polypropylene copolymer. Designed to combine functionality with aesthetics, it is suitable for automotive use. Compliant with ECE Regulation R73.01 – Side Protection Device.

Material

PP Copolymer

Colour

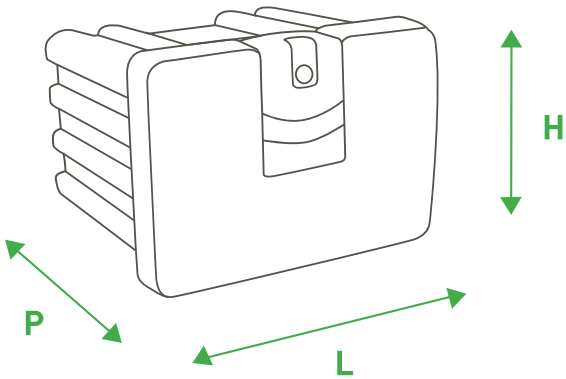

Matte black

Toolbox Evolution

Technical Features

- Anti-vibration handle with double locking system, complete with key and lock cap cover for additional protection against dust, water, and tampering.
- Fully sealed and waterproof, thanks to the wrap-around cover and water resistant seal.
- Reinforced hinge.
- High mechanical strength, even at low temperatures.
- Anti-UV treatment for increased durability over time.

Customizations

Company logo applicable via screen printing. Brackets available on request.

Assembly

Easy and quick installation.
